Index.html

The screenshot shows the homepage of "Shutters by Travelgram". At the top, there's a navigation bar with a camera icon, the site name, and links for Home, Contact, About, Login, and Signup. Below the header is a large image of a professional DSLR camera mounted on a tripod, set against a backdrop of mountains under a blue sky. A prominent black banner across the middle contains the text "Need a home for your travel photos?". To the left of the banner, there's a section titled "GET INSPIRED BEFORE YOUR NEXT TRIP" with a sub-section "Start learning & Improve Your Skills". It includes a quote about travel and a call-to-action button "Learn More for Tips on travel Photography". Below the banner are social media sharing icons for Facebook, Twitter, Google+, LinkedIn, YouTube, and Instagram. At the bottom of the page, there's a copyright notice and a footer with links to Blog, Photography Tours, Portfolio, and Info.

Connections.html

The screenshot shows the "Connections.html" page. It features a header with a camera icon, the site name, and links for Home, Contact, About, Login, and Signup. The main content area is divided into sections: "BEFORE YOUR TRIP" with a list of tips, "WHEN YOU ARRIVE:" with another list of tips, and "PHOTOGRAPHY TIPS" with a third list. At the bottom of the page is a black footer bar containing social media sharing icons for Facebook, Twitter, Google+, LinkedIn, YouTube, and Instagram. The footer also includes a copyright notice and a link to the file location: "file:///Users/bharadwaj/Desktop/Spring 20 coursework/NBAD/MILESTONE 1/connections.html".

Photography Tips

Rule of Two thirds

- This well-known photography rule still holds true. When in doubt, make sure you're using the rule of thirds to set up your photo.
- When framing a photo, imagine the scene divided up as above. Think about what elements of the photo are most important, and try to position them at or near the lines and intersections of the grid. They don't have to be perfectly lined up as long as they're close.
- For landscapes: place it along one of the horizontal lines
- For Vertical Subjects: split a photo in two, in much the same way as a horizon can do horizontally. To avoid this, position them off-centre in your composition

Is the rule interesting to implement?

I have created all the static websites as per the given requirement

Additional Features:

- These features include background image of the index page with dynamic overflow, and features that included the floating social media platform icons in the footer section of the webpage.
- The challenges encountered when designing the website are lack of on-page optimization
- The website has been validated using the WEBSITE validation tools and all the static pages have been passed with no warnings and errors

All the button actions are provided as per the given terms and conditions.
